Wine cap shrinking machine

1、 Introduction of this machine

The machine adopts a heating ring with uniform heating and a high-precision temperature controller to measure the heating temperature of a new wine cap shrinking machine. The outside of the heating ring is made of stainless steel, and the inside is made of ceramic radiator, which is resistant to high temperature and evenly heated. For the thermal shrinkage of red wine cap.

Its structure is simple, easy to operate, the shell is made of mirror stainless steel, the appearance is high-grade. It can meet the needs of household, workshop and small factory.

The machine adopts AC contactor to start and brake, and the setting temperature can be accurate to 1 °C.

2、 Technical parameters

Voltage and power: 220V 50 / 60Hz 600W

Bottle range: length 200-350mm, diameter 70-80mm

Control mode: Manual

Machine size: 450 * 150 * 240mm

Machine weight: 4kg

3、 Product structure

1. Set temperature adjustment: this time, it is used to set the rated temperature after heating stability, unit: °C.
2. Power switch: turn on when using and wait for 2-3 minutes for preheating. Please turn off the power when stopping working.
3. High reaction AC contactor, when the actual temperature is lower than the set temperature, the AC contactor heats the signal heating coil, and when the temperature reaches, the heating will stop automatically, making the heating temperature more stable.

4、 Work adjustment

Set temperature adjustment: press set key, the individual position will flash, press right key to adjust to the right, press up arrow key to increase, press down arrow key to decrease, so as to set the required temperature. Generally, the temperature can be set at about 170 °C. It depends on the material and thickness of the wine cap.

ap.

5、 Equipment warranty

1. Before repairing the machine, the main power supply must be turned off, and the professional personnel or the company should be informed for assistance.

2. This machine is guaranteed for one year. During the warranty period, if the machine fails due to quality problems, it will be repaired free of charge.

For the failure caused by improper operation or other force majeure, part of the cost will be charged, and the replacement parts will be charged according to the price.

3. If the warranty period is over, the cost of maintenance will be charged as appropriate.

4. When the user repairs by himself, provide the service of external parts.

5. This machine does not provide door-to-door service, and the way of warranty is repair.

Certificate

Product Name : ZS-830 wine cap shrinking machine

Model and specification : ZS-830
